

Blueprint MCAT's Online Course Test Results Summary

Overview

Blueprint launched a brand new MCAT Online course on April 7, 2020. As students took the course and then the official MCAT, we followed up with students to find out how they did on their official MCAT compared to the beginning diagnostic they had taken at the beginning of the course.

The Cohort Details

We emailed over 1000 students who purchased the Blueprint MCAT online course on or after April 7, 2020 and who also indicated in the online study plan inside their course a planned MCAT test date in the months of June - September 2020, to allow for at least 2 months of course usage. We asked for students to self-report their scores and if they would be willing to send a screengrab of their official MCAT score (total and by section). Of those emailed, 164 responded and 81 followed through by sending a screengrab of their official score. Final data set of 54 students excludes retakers and those who did not have a diagnostic exam score as a benchmark.

Blueprint MCAT's Online Course Test Results Summary

The Results

Across all 54 students in the cohort described above:

- The average score increase from diagnostic to official AAMC score was 13.1 points
- The highest score improvement among students in this group was a 28 score increase by student #27 who went from a 496 diagnostic to a 524 official MCAT score.
- 69% increased by 10 or more points
- 41% increased by 15 or more points
- 15% improved by 20 or more points

Furthermore

- 54% scored a 510 or higher
- 31% scored a 515 or higher
- 20% scored a 517 or higher
- 11% scored a 518 or higher

The Data

Listed below is the score data for each of the participants that provided their official score reports. Included in the table are the scores for the required diagnostic exam and any of the completed full-length practice exams as well as the participant's official MCAT score, the score increase from the first diagnostic to the final official MCAT score, and individual breakdowns of section scores.
